

# Ratios

Ratios can be written in three ways:

<u>As a Fraction</u>	<u>With a Colon</u>	<u>In Words</u>
$\frac{2}{3}$	2:3	2 to 3

\* Order Matters when Writing Ratios. The first word the Ratio asks for is the first Number you Write.\*

\* Ratios Must Be Written in Simplest Form!\*

What is the ratio of triangles to Circles?

$$\underline{6:2 = 3:1}$$

What is the ratio of Circles to triangles?
